Portfolio: siddivinayakadev.netlify.app/en

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of experience developing enterprise applications with React, Angular, TypeScript, and Web Components. Experience includes shared design systems, micro frontend architecture, accessibility, automated testing, REST API integration, and frontend performance.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, LESS

Frameworks and libraries: React, Next.js, Angular, AngularJS, Redux, jQuery, Bootstrap, Kendo UI, D3.js, Plotly

Architecture: Micro Frontends, Web Components, Design Systems, Component Architecture, Responsive Design, CSS Grid, Flexbox

Testing: Playwright, WebdriverIO, Cypress, Karma, Jasmine, End-to-End (E2E) Testing, SonarQube, Code Reviews

APIs, accessibility and performance: REST APIs, JSON, WCAG 2.1 AA, ARIA, VPAT, Lighthouse, Core Web Vitals, Chrome DevTools, React DevTools

Tools and delivery: Webpack, npm, Git, TFS, Jenkins, CI/CD, Agile/Scrum, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PowerSchool Group LLC

Bangalore, India | Mar 2023 - Dec 2025

- Designed and maintained 60+ Web Components for a shared design system used by multiple engineering teams in React and Angular applications.
- Raised the internal accessibility audit score from 78% to 94% through VPAT evaluations and component updates using WCAG 2.1 AA, semantic HTML, and ARIA.
- Established Playwright and WebdriverIO end-to-end tests using Chrome DevTools Protocol and integrated regression coverage into the release pipeline.
- Documented component APIs, states, and usage patterns to support adoption; defined requirements and API contracts with product, UX, and engineering teams.

Senior Software Engineer (UI) | OneTrust

Bangalore, India | Dec 2020 - Mar 2023

- Published a shared Angular library as versioned npm packages adopted across internal product modules, supporting migration toward micro frontend architecture.
- Developed WCAG 2.1 AA-compliant components with Angular, TypeScript, HTML, and CSS, incorporating responsive layouts, lazy loading, and virtual scrolling.
- Automated unit and integration testing with Cypress, Karma, and Jasmine, and incorporated SonarQube checks into continuous integration.
- Integrated REST APIs and JSON data contracts with backend engineers; maintained routing and package upgrades for consistent UI behavior across product modules.

PROFESSIONAL EXPERIENCE (CONTINUED)

Software Engineer | Baker Hughes

Bangalore, India | Aug 2018 - Nov 2020

- Built React and Angular dashboard components using backend-managed JSON contracts, allowing multiple teams to display operational data consistently.
- Created D3.js and Plotly components for time-series dashboards; reduced unnecessary chart re-renders through JSON processing and incoming-data throttling.
- Coordinated with backend teams on REST API contracts, JSON schemas, and application architecture for React and Angular operational dashboards.

Software Engineer | Time Inc.

Bangalore, India | Apr 2017 - Aug 2018

- Migrated a legacy Silverlight administration interface to Angular and Kendo UI, using lazy loading, virtual scrolling, and route-level component caching to improve performance.
- Mentored a junior frontend developer on Angular implementation and component reuse while developing responsive SCSS layouts and shared UI patterns.

Software Engineer | Mphasis | Client: Schneider Electric

Bangalore, India | Jun 2016 - Apr 2017

- Developed a region-aware AngularJS product configuration application supporting global product rules, configurable frontend behavior, and backend-managed record locking through REST APIs.
- Improved page-load performance by approximately 30% using sprite sheets, lazy loading, optimized assets, and changes to resource loading.
- Increased unit-test coverage from 30% to 80% for the AngularJS application using Karma and Jasmine.

Software Engineer | Spire Technologies

Bangalore, India | Dec 2015 - Jun 2016

- Visualized skill relationships with interactive D3.js charts to help recruiters compare related skills and assess candidate matches.
- Implemented the recruiter search and evaluation interface for Tag Automation, displaying candidate skill information to support manual review.

Software Engineer | Edcite Learning

Bangalore, India | Dec 2013 - Jun 2015

- Designed and maintained 5+ assessment components for teacher authoring and student assessments in collaboration with product and design teams.
- Implemented drag-and-drop, graph manipulation, live preview, and validation features for configurable assessments using JavaScript and jQuery.

PROJECTS

Portfolio / Micro Frontend Demo

Deployed a responsive Next.js portfolio with isolated micro frontends loaded through Web Component selectors, external scripts, and CSS.

EDUCATION

Diploma in Computer Science | SNM Polytechnic

Moodbidri, Karnataka | Graduation year: 2011 | Grade: 60%
