SUMMARY

Senior Frontend Engineer with 10+ years of experience building enterprise applications using React, TypeScript, Angular, and Web Components. Specialized in design systems, Micro Frontends, accessibility, testing, REST API integration, and frontend performance. Delivered 60+ shared components, improved an internal accessibility audit score from 78% to 94%, increased unit-test coverage from 30% to 80%, and improved page-load performance by approximately 30%.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, LESS

Frameworks & Libraries: React, Next.js, Angular, AngularJS, Redux, jQuery, Bootstrap, Kendo UI, D3.js, Plotly

Architecture & UI: Micro Frontends, Web Components, Design Systems, Component Architecture, Responsive Design, CSS Grid/Flexbox

Testing & Quality: Playwright, WebDriverIO, Cypress, Karma, Jasmine, E2E Automation, SonarQube, Code Reviews

APIs, Performance & Accessibility: REST APIs, JSON, Lighthouse, Chrome/React DevTools, Core Web Vitals, WCAG 2.1 AA, ARIA, VPAT

Tools & Delivery: Webpack, npm, Git, TFS, Jenkins, CI/CD, Agile/Scrum, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PowerSchool Group LLC

Bangalore, India | Mar 2023 - Dec 2025

- Designed and maintained 60+ framework-agnostic Web Components for an enterprise Design System adopted by multiple engineering teams across React and Angular applications.
- Led VPAT accessibility evaluations and improved an internal accessibility audit score from 78% to 94% by applying WCAG 2.1 AA, semantic HTML, and ARIA practices to reusable components.
- Established Playwright and WebDriverIO E2E automation using Chrome DevTools Protocol and integrated regression coverage into the release pipeline, improving confidence in shared UI releases.
- Defined component requirements and API contracts with product, UX, and engineering teams, and documented component APIs, states, and usage patterns to support consistent adoption.

Senior Software Engineer (UI) | OneTrust

Bangalore, India | Dec 2020 - Mar 2023

- Led migration toward a Micro Frontend architecture by developing a shared Angular library published as versioned npm packages and adopted across multiple internal product modules.
- Developed reusable WCAG 2.1 AA-compliant components using HTML, CSS, Angular, and TypeScript, incorporating responsive design, lazy loading, and virtual scrolling.
- Strengthened frontend quality through Cypress, Karma, Jasmine, SonarQube-integrated CI, and automated unit and integration testing.
- Partnered with backend engineers on REST API integrations, routing, JSON data contracts, package upgrades, and consistent UI behavior across product modules.

Software Engineer | Baker Hughes

Bangalore, India | Aug 2018 - Nov 2020

- Built reusable React and Angular dashboard components driven by backend-managed JSON contracts, enabling multiple teams to render operational views consistently.
- Created reusable D3.js and Plotly visualization components for time-series operational dashboards and data presentation.
- Optimized incoming-data rendering through efficient JSON processing, throttling, and reduced unnecessary chart re-renders.
- Coordinated REST API contracts, JSON schemas, frontend integration, and application architecture with backend teams.

Software Engineer | Time Inc.

Bangalore, India | Apr 2017 - Aug 2018

- Modernized a legacy Silverlight administration application by migrating its UI to Angular with Kendo UI.
- Improved performance through lazy loading, virtual scrolling, and route-level component caching.
- Engineered responsive SCSS layouts and reusable UI patterns, and mentored a junior frontend developer on Angular implementation and reusable-component practices.

Software Engineer | Mphasis - Client: Schneider Electric

Bangalore, India | Jun 2016 - Apr 2017

- Developed a region-aware AngularJS application for product configuration, supporting global product rules and configurable frontend behavior.
- Improved page-load performance by approximately 30% through sprite sheets, lazy loading, asset optimization, and resource-loading improvements.
- Increased unit-test coverage from 30% to 80% using Karma and Jasmine.
- Integrated frontend support for backend-managed record locking and REST APIs.

Software Engineer | Spire Technologies

Bangalore, India | Dec 2015 - Jun 2016

- Created an interactive D3.js skill-relationship visualization that helped recruiters compare related skills and identify stronger or weaker candidate matches.
- Built a Tag Automation frontend for recruiter search and evaluation workflows, surfacing structured skill signals to reduce manual review effort.

Software Engineer | Edcite Learning

Bangalore, India | Dec 2013 - Jun 2015

- Designed and maintained 5+ reusable assessment components for teacher-authoring and student-assessment workflows.
- Engineered drag-and-drop, graph manipulation, live preview, and validation functionality using JavaScript and jQuery.
- Delivered reusable, configurable assessment experiences in collaboration with product and design teams.

SELECTED PROJECT

Portfolio / Micro Frontend Demo | [Live portfolio](#)

- Built a Next.js portfolio shell that injects Micro Frontend experiences through Web Component selectors with external script and CSS loading.
- Demonstrates component isolation, runtime composition, responsive UI, and public deployment.

EDUCATION

Diploma in Computer Science | SNM Polytechnic

Moodbidri, Karnataka | 2011

Grade: 60%

CERTIFICATIONS

- CutShort Certified JavaScript - Advanced, CutShort | Jan 2020
- CutShort Certified HTML/CSS - Basic, CutShort | Jan 2020
- Designing Websites for Performance, LinkedIn | Jul 2019
- Learning Functional Programming with JavaScript, LinkedIn | Aug 2018
